Summary

Full-stack developer with proven experience shipping 10+ games and cross-platform applications using Unity, React, and Flutter. Skilled in cloud architecture and real-time systems, seeking to leverage my end-to-end development experience in a growth-focused tech role.

Education

Software Development Program – Keyin College	May 2025
BBA: Business Administration – Memorial University of Newfoundland and Labrador	May 2025
BSc: Computer Science – Memorial University of Newfoundland and Labrador (In Progress)	Dec 2025

Projects

Game Development – Unity (C#), Blender

- Developed and optimized 10+ cross-platform games in Unity for mobile, desktop and web deployment.
- Published 10 complete games on stoozly.itch.io generating over 500+ plays.

Cryptocurrency Farm

- Independently built and managed a cryptocurrency mining farm with 20+ GPUs, deploying custom scripts and monitoring tools to track temperatures, hash rates, and power usage, maximizing profitability and operational stability.

LexAI – Next.js

- Contributed to a Next.js based AI Literacy Tutor through backend planning, frontend development, and testing.

Whatchu Cooking? – Flutter, Firebase

- Co-developed "Whatchu Cooking?"—a feature-rich, cross-platform social recipe-sharing app using Flutter and Firebase—alongside a team of three peers, emphasizing collaboration, real-time data handling, and user-focused design.

Jewelry Portfolio App – React.js

- Implemented a responsive web application for tracking and calculating real-time jewelry valuations with React Hooks and TypeScript.

Math Competition App – Node.js, Express.js, Jest

- Developed a full-stack web application with dynamic question generation, difficulty levels, streak tracking, and leaderboards using Node.js, Express, and Jest for testing.

Experience

Ladderspike – Software Development Intern

2024

- Contributed to redesigning key components of the company website using modern UI/UX principles.
- Conducted market research on competing platforms and helped design product mockups in figma.

Technical Skills

Languages: Python, C, C#, Java, JavaScript, SQL, HTML

Frameworks: Flask, Bottle, React, Express, Next, Node, SciKit-learn

Databases: MongoDB, PostgreSQL, SQLite, Prisma

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, CloudWatch, CloudFormation, IAM)

Tools: Git/GitHub, Postman, Jupyter Notebook, SageMath, Unity, Blender, Figma, VS Code, Android Studio

Certifications & Achievements

QA/QC Certified Tester Foundation Level 4.0 – ISTQB®

AWS Academy Graduate – Cloud Developing, Cloud Architecting, Solutions Architect Associate

AWS Certified Solutions Architect Associate

NL Hackathon 2024 – “Most Technical Award” winner
